eScan Internet Security Suite

Complete Security Solution

The internet is a wonderful tool, which connects people across time zones very economically. The freedom it provides has its drawbacks though - the Internet is teeming with viruses and other malware. New internet threats are being discovered daily, and some of them can cause a lot of damage. To combat these internet threats, one needs a powerful weapon like MicroWorld's eScan Internet Security Suite for Windows.

MicroWorld is among the leading solution providers in anti-virus and content security solutions across the world. Their security services are designed to help individuals, small and mid-sized businesses, and large enterprises, secure and manage their information & infrastructure.

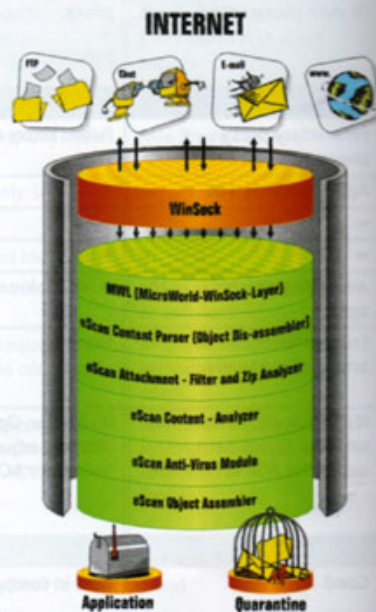

MicroWorld operates through different segments with their eScan and MailScan range of products which ensures total security to your computer networks, mail servers and individual PC's covering Windows and Linux platforms.

The company has offices in the United States, Germany, and India, and an active channel network partners and resellers worldwide.

MicroWorld Technology – MicroWorld Winsock Layer (MWL)

MicroWorld pioneered a new approach to dealing with Information Security threats with its MWL technology. MicroWorld Winsock Layer (MWL) blocks Information Security threats at the Internet Gateway itself, way before they can reach your system. It gives (eScan and MailScan) an edge that has seen them being honoured with several certifications and awards by some of the most prestigious testing bodies, notable among them are Virus Bulletin, Checkmark, TUCOWS, Advanced CheckVir, Red Hat Ready, and Novell Ready.

As illustrated in the diagram, all Internet traffic as FTP, Website, eMail and Chat goes through the Winsock Layer. MicroWorld's product sets up a transparent layer on Winsock scanning all the Internet traffic and taking action on unwanted traffic by either deleting, disinfecting or quarantine.

eScan Internet Security Suite

eScan Internet Security Suite is a complete solution based on MWL technology, designed to protect computers against cyber threats with following features.

- AntiVirus, AntiSpyware, Adware
- eMail & Attachment filtering (Spam Killer)
