**MICROWORLD TECHNOLOGIES, INC. EXPANDS DISTRIBUTION THROUGHOUT  
CENTRAL/SOUTH AMERICA, MEXICO AND PUERTO RICO**

**—With the alliance of major distributors, MWTI will service major markets with eScan and MailScan anti-virus technologies—**

**Old Bridge, New Jersey, April 28, 2002**—MicroWorld Technologies, Inc. (MWTI), a leading solution provider for information technology, content security, and communications, today announced strategic alliances with several major distributors throughout Central and South America, Mexico and Puerto Rico. By aligning with these partners, MicroWorld expands their customer base extensively in the Spanish and Latino markets with their *eScan 2003* and *MailScan Version 4* anti-virus technologies.

MWTI expands their exposure globally with major partners such as Antivirus LTDA. and It & Security Consultores LTDA. in Colombia, Global Software of Argentina, Tecem Tecnología De Empresas from Chile, PPC S.A. in Ecuador, Trato Soluções Para Internet in Brazil, Ingenieria Y Sistemas C.A. of Venezuela, Global Software Solutions in Mexico, Ice Networks from Puerto Rico and a host of resellers.

*eScan 2003* is the world's first real-time anti virus, content security and TCP-IP traffic scanning software package that is built using the revolutionary MWL technology. It checks content in emails, attachment files and web pages on a real-time basis. The checks are made for viruses, restricted words and phrases as well as for embedded objects like Java applets, etc.

*MailScan Version 4* is content security software for corporate mail servers that perform content filtering and virus scanning of computer systems, and provides complete and secure messaging solutions for e-business.

"These alliances give MWTI entry and maximum exposure into these global markets," said Govind Rammurthy, managing director and chief executive officer of MicroWorld. "As we look to addressing customers' demands of *eScan* and *MailScan* products in Central and South America, Mexico and Puerto Rico, our partners in these countries will be able to provide expedient service and distribution."
