## MicroWorld To Participate At CeBIT

Published 24th February 2006

MicroWorld is gearing up to showcase its powerful solutions at CeBIT Trade Fair at Hannover, Germany . Its antivirus, Content Security and Network Security products will feature in the fair with extensive product information and live demos.

CeBIT is the world's largest trade fair showcasing IT and telecommunications solutions for home and work environments. The key target groups are users from industry, the wholesale/retail sector, skilled trades, banks, service sector, government agencies and all users passionate about technology. CeBIT offers an international platform for comparing notes on current industry trends, networking and software products.

At the fair, MicroWorld will be displaying three major security products: eScan, MailScan and eConceal. eScan is a comprehensive antivirus and Content Security solution designed to provide enterprises and personal computers with essential protection against Viruses, Spyware, Adware, Malware, Keyloggers, Hackers, Spammers, privacy related issues and objectionable content.

MailScan is the total Content Security and Traffic Scanning software for Mail Servers that checks email content and its attachments for viruses and other online threats. The new offer from MicroWorld, eConceal Firewall, is a comprehensive enterprise-class firewall, currently under beta testing.

“The last few years has witnessed unprecedented interest in our products at the international level. eScan Enterprise 2006 version comes as a revelation for corporate houses in enforcing a Centralized Security Policy across the enterprise. Its Real-Time proactive scanning ensures comprehensive malware protection for organizations, big and small alike.” reveals Sunil Kripalani, Vice President, Global Sales and Marketing, MicroWorld.

“Business houses are now discovering that viruses with pure destructive purpose are a thing of the past. Today these threats have larger financial and informational motives too, along with destruction. Worms and Trojans are now trying to steal funds or invaluable business critical information. Besides that, issues like spamming results in loss of bandwidth and wastage of production time. Our solutions tackle all these concerns in a comprehensive and integrated manner” explains Sunil Kripalani about the global Information Security Scenario and how MicroWorld readies to tackle it.

With a vision anchored on the future, MicroWorld promises to deliver robust and persuasive solutions at the CeBIT fair.
