eScan Receives Checkmark Certification Once Again

Published 5th June 2006

AntiVirus and Content Security solution eScan from MicroWorld Technologies, has won Quality Assurance from Checkmark once again. The certification marks another milestone for the world's most advanced Integrated Security Software...

The acclaimed software testing and certification body, Checkmark, certifies information security products to real-world benchmarks. It employs established, independent standards on product effectiveness and functionality while benefiting technology developers, decision makers and information security product buyers across the world. Products registered at the Checkmark System are tested at regular intervals against published test criteria to ensure that consistent quality assurance is maintained.

“Performance tests conducted by renowned testing bodies like Checkmark bring in great transparency for Security solutions,” said Sunil Kripalani, Vice President, Global Sales and Marketing , MicroWorld Technologies. “While we maintain a continuous and steadfast quality adherence at all levels of our operations, it’s equally important for our products to get approved by independent testing bodies as well. I’m sure, this continued Quality Assurance will enable discerning customers to make an informed and value-added choice.”

eScan is an enterprise-class Information Security software that protects users from Viruses, Spyware, Adware, Malware, Keyloggers, Hackers, Spammers, Privacy

related issues and objectionable content. It works on a combination of its powerful Virus scanner and MWL Technology. eScan also comes in a robust home user version that provides Proactive Security for personal computers.

The software reacts quickly to emerging threats like new Viruses and other malware. eScan's AntiVirus database is updated every hour and Spyware signatures are updated as often as twice an hour.

"It's our persistent endeavor to create safer computing environments for users across the globe," said Govind Rammurthy, CEO, MicroWorld Technologies, on the occasion. "Malware creation and distribution is increasingly becoming a well organized criminal network with clear financial and informational motives. With such volleys getting more targeted and technically advanced, the need for comprehensive security solutions with zero tolerance for errors has never been bigger. The approval from foolproof quality standards like Checkmark gives us that powerful impetus in implementing and maintaining infallible Defense Systems for computer users at all levels."
